Title: FAREWELL (Tribute)

Music and lyrics by Diego DE

Verse 1

WHAT HAS CHANGED? BESIDE THE SKIN? IT FEELS THE SAME, IT SEEMS LIKE YESTERDAY
WHAT HAS CHANGED? BESIDE THE FEARS AND WILLINGNESS

Part B

I REMEMBER THAT FIRST DAY, WHEN I HEARD: "LIVE FROM THE LUNA PARK"
WAS ON VINYL AND WASN'T MINE, WHAT A DAY... NOW I CAN SEE

Chorus 1

CHANGED MY LIFE FOREVER, TURNED TO THE RIGHT SIDE
THE SIDE WHERE ALL THE SENSES FLY SO HIGH NO ONE CAN HIDE
SLOWED THE TIME AROUND ME, SLOWED MY OWN PEACE OF MIND
THAT PEACE CAN BE ACHIEVE WHEN YOU KNOW WHAT YOU REALLY LIKE

Verse 2

WHAT HAS CHANGED? IN ALL THIS TIME? SO MANY SONGS, MAYBE MORE TO COME
WHAT HAS CHANGED? BESIDES MY LIFE... BESIDES MY LIFE

Bridge

MAYBE THE ESSENCE OF THE WILD, A SURPRISE ON EVERY CHORD
IT'S THE ESSENCE OF HIS ART... SO FUN

Chorus 2

CHANGED MY LIFE FOREVER, TURNED TO THE RIGHT SIDE
THE SIDE WHERE ALL THE SENSES FLY SO HIGH NO ONE CAN HIDE
SLOWED THE TIME AROUND ME, SLOWED MY OWN PEACE OF MIND
THAT PEACE CAN BE ACHIEVE WHEN YOU KNOW WHAT YOU REALLY LIKE

1. GETTING STARTED

Install • launch • understand the workspace

VST 3

Install **WRITE PAL.vst3** in the main Library VST3 folder, then rescan or restart the DAW.

AAX

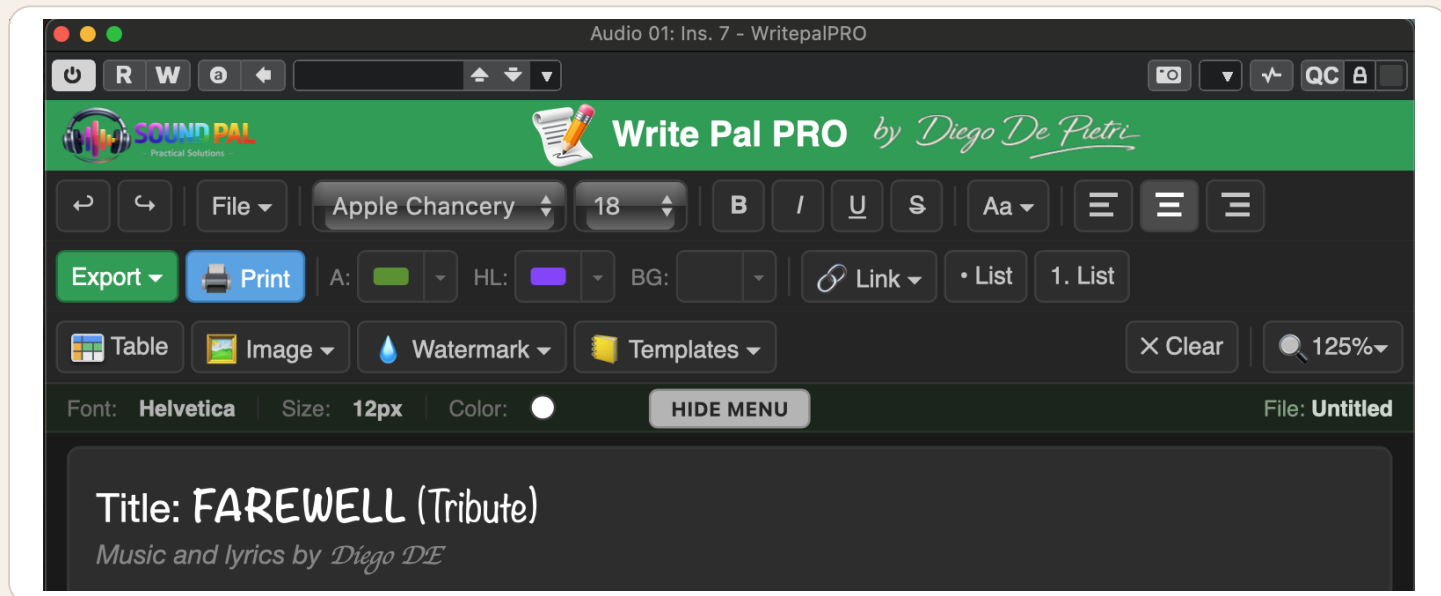

Install **WRITE PAL.aaxplugin** in Avid's main Plug-Ins folder, then restart Pro Tools.

AUDIO UNIT

Run the AU installer (or place the component in the main Components folder), then restart Logic.

STANDALONE

Place **WRITE PAL.app** in Applications on Mac; use the Windows application build on PC.

Work from top to bottom

- **Top bar:** Sound Pal, Write Pal PRO identity and About links.
- **Formatting:** Undo/Redo, File, font, size, style, case and alignment.
- **Page tools:** Export, Print, colors, links, lists, tables and media.
- **Info bar:** Current font, size, color, filename and Hide Menu.
- **Footer:** Status, license/trial, word/character/line totals and AU Resize corner.

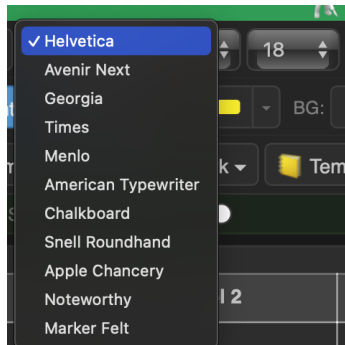

Files, sessions and licensing

- A new installation starts with an empty canvas. Select a template only when needed.
- Each DAW plug-in instance stores its own document inside the project. Save the DAW project after editing.
- Use **File > Save/Save As** for portable .wpal copies; use **Load** to reopen them.
- The standalone app and plug-in license are activated separately. The full trial lasts seven days.
- Click the trial/license badge to activate. No license key is displayed by the app.

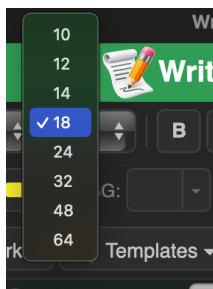

Important: Closing a DAW project is not a substitute for saving it. Save the Cubase or Logic project so Write Pal's per-instance document and UI zoom are restored next time.

FORMAT THE SELECTION

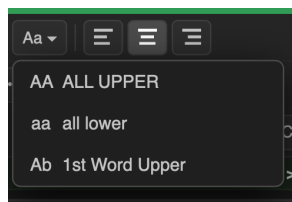

Select text, then choose a font and size; apply **Bold**, **Italic**, **Underline** or **Strikethrough**; change case; or align left, center or right. The A, HL and BG palettes control font, highlight and background colors.

SIZE

CASE + ALIGN

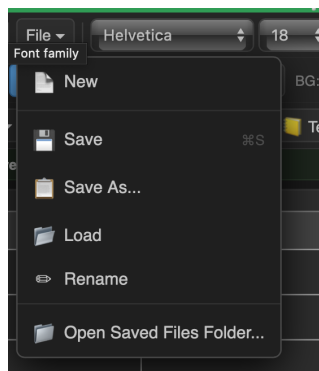

LINKS

COLOR PALETTES

EDITING & SHORTCUTS

- **Command-A** selects the entire editor; **Command-C**, **Command-X** and **Command-V** preserve rich formatting inside Write Pal.
- **Command-Z** undoes and **Shift-Command-Z** redoes. Toolbar Undo/Redo perform the same actions.
- Use bulleted or numbered lists from the second toolbar row.
- Use **Clear** to remove the page content and watermark; Undo can restore the change.

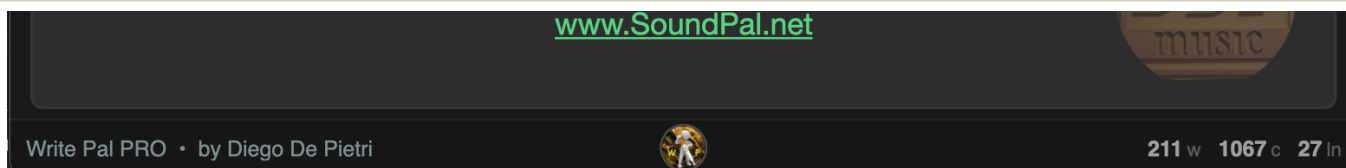

FILE MENU

FILE WORKFLOW

- **New** starts clean.
- **Save** updates the current .wpal file.
- **Save As** creates a named copy.
- **Load** opens a saved file.
- **Rename** changes its displayed name.
- **Open Saved Files Folder** lets you organize or delete files in Finder.

LIVE DOCUMENT STATUS The footer shows live word (w), character (c) and line (ln) counts, plus trial/license status and product links.

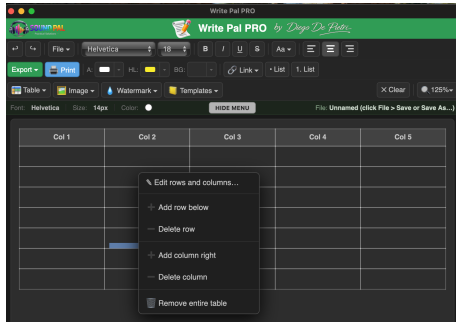

EXPORT & PRINT

- **Export > Save as PDF** creates a Letter-size page; **Save as Screenshot (PNG)** captures the full composed page.
- **Print** opens the macOS printer dialog. Choose the PDF menu there when you want macOS "Save as PDF."
- Text formatting, tables, images and watermarks are included in the composed output.

Tip: Save the .wpal document before exporting so the suggested PDF/PNG filename follows your document name.

TABLES

Insert a table with the required rows and columns. Click inside a table, then use the Table menu or right-click menu to edit its structure.

EDIT ROWS & COLUMNS

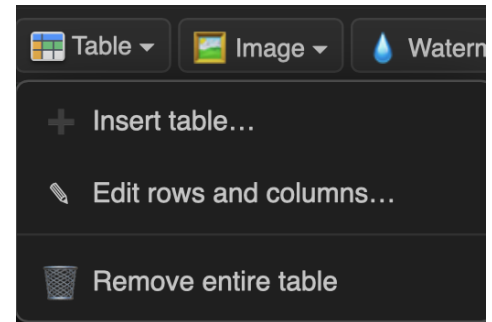

TABLE MENU

- Tab moves left-to-right through cells; Shift-Tab moves backward. Press Tab in the final cell to create a complete new row.
- Add/delete the current row or column, resize the table by changing row/column counts, or remove the entire table.

IMAGES & WATERMARKS

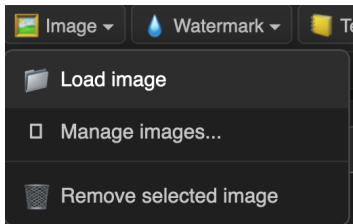

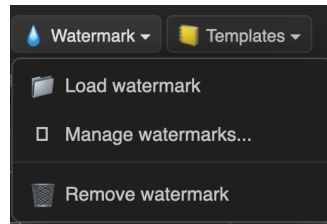

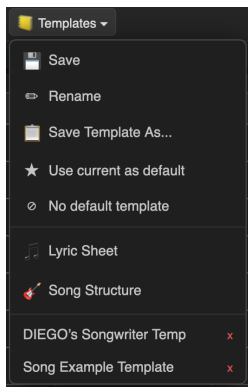

IMAGE LIBRARY

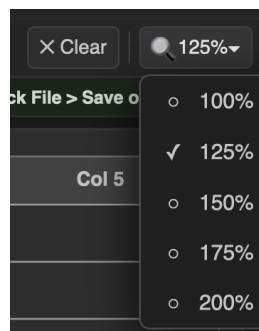

WATERMARK LIBRARY

- Load or manage saved artwork.
- Select an object to show its red delete X, resize handles and opacity slider.
- Drag to position. Normal resizing preserves proportions; hold Shift for free resizing.
- Images and watermarks share a 10 MB combined library limit.

TEMPLATES, VIEW & HELP

TEMPLATES

UI ZOOM

REUSABLE SETUPS

- Choose Lyric Sheet, Song Structure, or any included template.
- Save the current page as a named user template; rename or delete it from the same menu.
- **Use current as default** loads that setup automatically. Choose **No default template** to return to an empty startup canvas.
- User templates are shared across the standalone app and every plug-in instance on the same Mac.
- UI Zoom (100–200%) is remembered. Hide Menu creates more writing space.
- The macOS Help menu opens the Quick Reference. About shows version information.
